

Signing Up

If too many people sign up for the course, I will perform a lottery among those who have signed up, and announce the results by email on Wednesday, Feb 4th.

First Reading Assignment

- Constrained Coding and Soft Iterative Decoding: Chapter 1, Sections 1.1 and 2.1.

Note: There is an error at the end of Example 2 on page 3. The author claims that, in this example, $p_3^{post} = 1/2$, which is wrong. In this case, $p_3^{post} = 4/9$.
